

Williams Mata

Senior Fullstack & AI Engineer

 williams.rm99@gmail.com  [+58 422 1109999](tel:+584221109999)  Remote / Nueva Esparta, Venezuela  [Portfolio](#)

Professional Summary

Results-driven Senior Fullstack & AI Engineer specialized in RAG architectures, autonomous agents, and high-traffic distributed systems. Expert in the full software development lifecycle and deploying production-ready SaaS solutions that optimize operational efficiency and reduce costs through Artificial Intelligence.

Professional Experience

Loadify (Logistics SaaS) Remote
Lead AI Engineer Oct 2025 - Present

- Architected an autonomous agent system based on ReAct cycles and Tool-Calling for the automation of logistics operations.
- Integrated real-time voice agents using RetellAI and developed complex orchestrations with n8n.
- **Key achievement:** Reduced manual operational workload by 90%, optimizing response times and product scalability.

loadify.net

Cercademi Remote
Lead Full Stack Developer Mar 2024 - Oct 2025

- Led the end-to-end development of a critical medical appointment ecosystem, ensuring high availability.
- Implemented secure payment orchestrations via MercadoPago and optimized database query performance.
- **Key achievement:** Significantly reduced technical debt by planning and executing the system's migration to a modular TypeScript architecture.

cercademi.cl

Argxp Remote
Full Stack Developer Jul 2023 - Feb 2024

- Developed 2 high-traffic web applications from scratch working under the SCRUM agile methodology.
- Designed and implemented reusable UI component libraries and established efficient CI/CD workflows.
- **Key achievement:** Ensured 99.9% production uptime by optimizing the continuous deployment process.

Featured Projects

Loadify AI - Logistics Orchestrator 2025
High-impact B2B SaaS leveraging RAG and conversational voice agents to automate logistics load searching and real-time rate negotiation.
[View Project](#)

TLDR Bot - Advanced RAG Assistant 2024
High-precision RAG system deployed on Telegram. Features Hybrid Search and data Re-ranking strategies to process long chat histories.
[View Project](#)

Education & Training

Self-Taught Education Specialization in Full Stack Development & Artificial Intelligence
Software Engineering Remote • 2020 - Present

Continuous learning and advanced training based on real-world projects, intensive reading of official documentation, and development-focused educational platforms. Deep specialization in TypeScript, React, and Node.js ecosystems, alongside AI solutions (RAG, Autonomous Agents).

Technical Expertise

 **AI & Automation**

Senior

OpenAI, RAG Pipelines, ReAct Agents, Vector Databases, RetellAI, n8n

 **Fullstack / Backend**

Senior

Node.js, TypeScript, Next.js, NestJS, Python, PostgreSQL, Prisma

 **DevOps & Cloud**

Intermediate

Docker, CI/CD, AWS / GCP, Git

Languages

Spanish

Native

English

Advanced (B2/C1)
